

## **Database and Web Services Group Project ~ jClub**

### **Group 14**

**Group Members:** Ankit Pandit, Arnav Singh, Nayan Man Singh Pradhan

**Access URL:** <http://clabsql.clamv.jacobs-university.de/~arsingh/>

### **Search Component**

Our web application consists of three landing pages:

- For a user who has not logged in
- For a user who has logged in with a 'Student' account
- For a user who has logged in with a 'Club' account

We have designed our web application such that our "Search Bar" is visible in two of the three landing pages:

- For a user who has not logged in
- For a user who has logged in with a 'Student' account

Our second "Search Bar" is Student Search and can be accessed through all three landing pages.

The three queries that can be accessed through the search bar:

- Search for Activities through main search box
- Search for Clubs through main search box
- Search for Students through Student Search in Navigation Bar
