Database and Web Services Group Project ~ Jacobs Club Manager

Group Members: Ankit Pandit, Arnav Singh, Nayan Man Singh Pradhan

Our Corporate Logo

Our Corporate Design

Our web application aims to provide a simple and minimalistic visual user interface such that the user can easily navigate between pages and find relevant information. Our user interface and logo reflects the minimalistic design style we decided to implement.

The landing page of our website contains a navigation bar, the company logo, a search bar, six icons that are relevant for the types of clubs, a welcome message, and a login/signup option. The navigation bar contains "Menu", "Clubs", "Imprint Page", "Services", "jClub", "Login", and "Signup". We are still working on linking these buttons to the appropriate hyperlink. As of this assignment, "jClub" and "Home" redirects the user to the home (landing) page, the "Imprint Page" redirects the user to another html file containing the legal imprint documents, the "Clubs" redirects the user to the Jacobs Clubs Website, the "Menu" opens a side nav bar containing "About", "Services", "Clients", and "Contact" (which will be edited to relevant titles in the future) and the Services has three drop down menus: "Sign Up For Clubs", "Start a Club", and "Contact Us". The "Login" button allows the user with a pre-existing account to login to his/her account, and the "Sign Up" button allows the user to sign up for his/her account. Both "Login" and "Sign Up" do not work as of now.

The user can scroll down using his/her mouse as well as through the downward facing arrow to reveal two quotes about our web application, and a FAQ section. The FAQ section is an expandable and collapsible interface, such that the user may choose to view the answers of relevant questions that the users may have. The FAQ section contains five questions that the user may be curious about. At the end of our web application, we have a footnote that contains our company logo and motto, copyright messages, social media handles, and a small goodbye message.
